

NIVISS

**EX PROOF
LED LIGHTING**

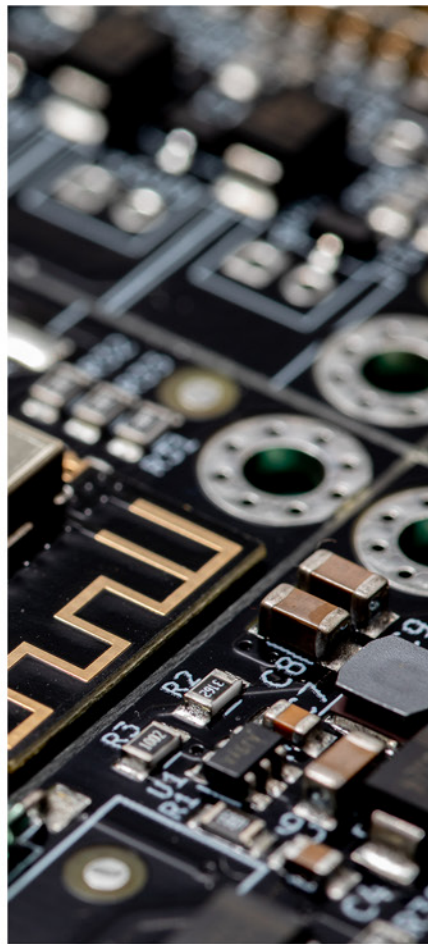

Niviss has extensive experience in the design and manufacture of LED modules dedicated to luminaires for explosive atmospheres (EX). The modules we design find their applications in lamps with applications in all three zones of the explosion hazard classification, guaranteeing the provision of proper workplace lighting and high quality light.

We are not afraid of difficult projects.

Reliability is the hallmark of both our LED modules and high-quality optical solutions, which often determine the shape of the entire product. Niviss LED modules dedicated to luminaires for explosive atmospheres (EX) always guarantee high-class lighting parameters regardless of the working environment. These can be road tunnels, mines or gas stations.
